NVI, LLC Mid-continent Business Unit under New Management

Northglenn, CO – August 24, 2017 -- Over the past seven years, William "Billy" Schneider, Northeast U.S. Regional Director, and David Chamberlain, Northeast General Manager, along with their team of highly capable, experienced, and loyal Operations Managers, Safety Officers, RSO's, Quality Compliance Auditors and best in class technicians have built NVI's Northeast Business Unit into one of the company's most valuable assets. This Business Unit, with locations in Pittsburgh, PA and Buffalo, NY, serves a vast array of industrial clients, ranging from rail, manufacturing, machining, upstream, midstream, downstream, fabrication, refrigeration, utility and power generation. The primary service lines in this market are NDT services, both conventional and advanced services, API, NACE, Mechanical Integrity services, Useful Life Asset Evaluations, Cathodic

Protection Surveys, and Installations, as well as full-service Heat Treatment, Failure Analysis, and associated Metallurgical Services.

Based on the success, NVI LLC's President and Chief Executive Officer, James Cloutier wishes to announce that this team will have direct oversight of NVI's Mid-continent Business Unit based in Northglenn, CO. Mr. Cloutier states, "It is a wonderful thing to see previous and current clients of NVI reach out to Billy and David to request NVI's services in other markets in the U.S. Based on this and other beneficial factors, it feels like the perfect fit for further expansion of NVI's services into this solid market. We have been working in Colorado since 2007 and foresees a very bright future moving forward for this large-scale commitment in the mid-continent area. There is a definite need for quality NDT and personnel capable of exceptional production levels, and that's what NVI is aiming to deliver, both with advanced and conventional NDT methods along with our other broad industrial service lines".

With the excitement of this transition, our primary focus and goal is still to provide the best highly trained individuals and superior production levels to keep our clients satisfied and the life of their asset long-lasting.

NVI, LLC

NVI, LLC, a privately owned nationwide industrial solutions provider, has achieved an unequalled reputation for quality, responsiveness, and safety.
