

Streamlined Processes Reduced Redundancy

NVI offers a unique proprietary software, NVIision, which is a program that is completely customizable to client specifications and offers real-time reporting and information.

We developed our Field Information System with the goal of enhancing accuracy and efficiency in processes. The software was designed to minimize redundancies, resulting in a more streamlined and effective workflow.

Real-Time Data

Safety

- Reporting of real-time behavioral observations and customized alerts when immediate action is required
- Metrics including percentage of compliance of JSA's and regulatory procedures

Supply Chain

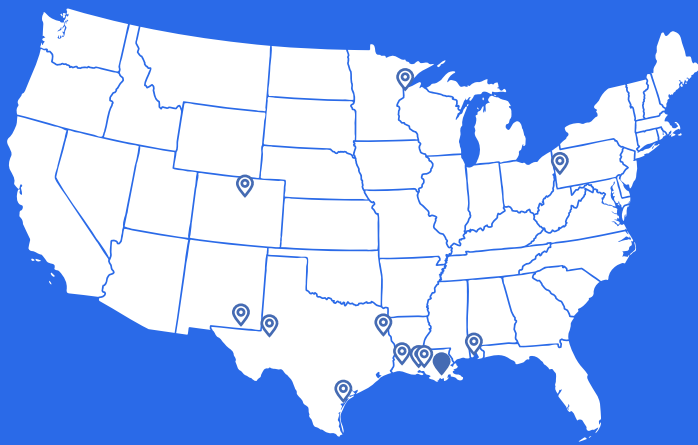

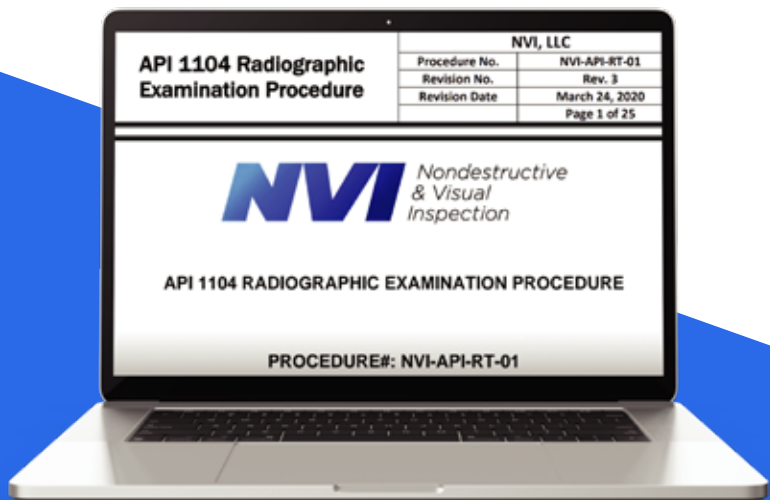

- Faster and accurate billing
- Instant PO and AFE tracking with custom budget overage notification
- Logic enabled to ensure overtime, standby and work delay compliance

Operations & Field Management

- Daily project information reporting which include time spent on job site
- Project production data including number of items inspected and specificity of inspection
- KPI reports customized to your protocol
- Fully integrated access to information as a partner with NVI providing complete access to information collected during projects
- Project completion percentage

QA/QC

- Tracking and clear reporting of welds
- Discontinuity trends by welder, job site, supplier and vendor
- Import and export complex welding/drawing numbers eliminating typos, transposed numbers and other errors that may occur during database exchange
- Assurance that procedures are systematically updated and communicated to the end user
- Latest industry codes, procedures and recommended practices are instantly viewable by the end user
- Complete quality and safety management functionality of KPI and NCR management
- Reporting of real-time behavioral observations
