

ROPE ACCESS DONE RIGHT.

SAFE. EFFICIENT. VERSATILE. DONE RIGHT.

NVI rope access solutions provide safe, efficient, and cost-effective access to hard-to-reach areas without the delays, expense, and site disruption associated with traditional access methods.

By reducing the need for scaffolding, cranes, and lifts, our rope access teams can mobilize quickly, lower access costs, and help keep projects moving on schedule. This approach also minimizes worker exposure to heights while allowing inspections and services to be completed with less downtime and a smaller site footprint.

TRAINED. CERTIFIED. COMMITTED.

NVI rope access technicians are **SPRAT** and **IRATA** trained and equipped to deliver best-in-class solutions, upholding the highest safety standards on every project.
