

# Tank Solutions DONE RIGHT.

## Why Choose NVI?

At NVI, we specialize in comprehensive tank solutions for every stage of your tank's lifecycle. Whether you're constructing a new tank, modifying or repairing an existing asset, or conducting routine interval inspections, our expert team has you covered.

Our tank team focuses singularly on tank solutions, ensuring meticulous attention to every detail from initial welding to final assessment. We adhere strictly to API 653 standards for aboveground storage tanks and Steel Tank Institute (STI) standards for 12f tanks, providing clear guidance to ensure full compliance with industry regulations. Additionally, our services ensure your tanks meet Environmental Protection Agency (EPA) and Department of Transportation (DOT) requirements, safeguarding both the environment and your operational compliance.

When you choose us, you're not just hiring inspectors - you're partnering with dedicated specialists. Our team will guide you through the entire process, managing all technical aspects so you don't have to. We're committed to inspecting your tanks to the highest standards, ultimately maximizing their lifespan and reliability.

Let us take the complexity out of your tank commitments, allowing you to focus on your core business with confidence in your tank infrastructure.

## Service Offerings

- API 653 (In Service / Out of Service) Inspections
- Seal Gap Inspection
- Settlement Survey
- Verticality Inspection
- Tank Volume Calibration
- PMI (Positive Material Identification)
- Hardness Testing
- MFL (Magnetic Flux Leakage)
- Advanced Mapping (MFL - Magnetic Flux Leakage)
